

Hi Reception!

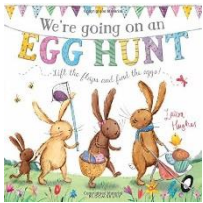

I hope that you are doing a little bit of school work each day.

Have a lovely Easter. It will soon be time for the Easter Bunny to visit!!

Here are some more exciting things for you to do at home.

Miss Wells. X

If you click on the following link you will find some fun maths activities linked to the story. You need Week One for the Easter activities.

<https://whiterosemaths.com/homelearning/early-years/>

Remember that you should be practising your phonics every day. How about making your own phonics mat just like the one I put on the website earlier in the week. You could think of your own pictures to draw and label.

Why not have a bit of fun with bubbles and foam. Put some washing up liquid and water in a bowl. Whisk for different lengths of time to see how many bubbles you can make. Add a bit of food colouring to make it different colours.

Build an obstacle course in your garden. It will be lots of fun and you will get lots of exercise too. Draw and label a map of the route that you want the contestants to follow. Have a competition with your family.

Happy Easter everybody!
