

Dear Year 3 and families,

I hope that you are all happy whatever you are doing.

I have put together a little plan for your maths lessons throughout the week, borrowed from White Rose. This is a scheme that I sometimes use for our maths lessons, so the activities might look familiar to you.

Don't worry about printing out the sheets; you could just use some paper and write down the answers.

Visit:

<https://whiterosemaths.com/homelearning/year-3/>

It will take you to this page. Click on **Week 1**. There is a short video and an activity to the right.

Once you've done the answers, you can mark them yourself.

There are five lessons in each week. This means you can do one lesson per day.

Active Learn

I can see lots of you have been accessing Active Learn and attempting the maths activities you have been set.

I will be notified if you complete all of your allocations and need new ones.

Love from Mrs Lonsdale x
