

# Hi Reception!

It would be lovely to hear from you on our class blog. You can even put photos of you and your work on it to share with me and your friends.

Looking forward to hearing from you and maybe even seeing you, well a photo anyway.

Miss Wells. X

The new book from the Lancashire English and Literacy team this week is Mad about Minibeasts. You will find it on the tab, Home Learning - Book of the Week. I liked singing along to Creepy Crawlies and Itchy Things!

This is a really good for practical maths. There is a task to do each day and there are even videos to show you how to play the games. Click on the link below and find out for yourself.

If you like doing maths on the computer, I have put some more activities on abacus which you will find on the Active Learn site.

I think this minibeast mobile is fantastic. Watch and find out how to make one. It may take a little time to complete as there is sooooo much to make! Have fun and don't give up.

We all love a minibeast hunt in Reception so why not have one at home? Use the identification sheet to help you find out the names of the minibeasts you have found in your garden. Don't forget to look under stones and twigs.
